The Mozy Advantage

Reliability
You can enjoy peace of mind in knowing that your end user data is backed up utilizing the highest standards of reliability.

Scalability
While other backup providers are limited by storage constraints, Mozy can easily scale to accommodate millions of users.

Feature Rich, Intuitive
Not only will your IT department appreciate Mozy's robust set of features, your end users will appreciate the intuitive, simple-to-use interface as well.

Mozy Online Backup – Simple, Automatic, Secure

From small businesses to large corporations, the critical task of PC backup can be an expensive and challenging endeavor. Fortunately, Mozy has made enterprise backup possible for everyone with its affordable, secure solution that's simple to manage and even easier to use. Whether you're the office manager of a small law firm, an IT consultant, or the CTO of a Fortune 100 corporation, MozyPro is your enterprise solution for remote data backup.

Your IT department will appreciate the way Mozy seamlessly integrates into your organization's existing infrastructure, and your finance department will appreciate the fact that Mozy doesn't require any additional capital expense for tapes, CDs, or hardware.

Did you know?

- 100% of Best-in-Class companies achieve remote office data recovery more than 90% of the time.
- On average, 82% of remote office data is backed up in Best-in-Class companies.
- 92% of Best-in-Class companies store their remote office backup data in a secure offsite location, company headquarters or at a managed service/online backup service provider to ensure their data can be recovered when needed.

–*September 2007 Aberdeen Benchmark Report*

With Mozy, you'll get the tools you need to take total control of your company's data backup solution.

Web-based Administrative Console

- **Create sub-administrators**
- **View individual or aggregate account usage, history, and stats**
- **Change account status (disable, cancel, or re-enable any account)**
- **Reset account passwords**
- **View and distribute license keys**
- **Customize individual and group configuration settings**

Professional Support

As a MozyPro customer, you'll have access to 24/7/365 email and phone support. When you suffer data loss, MozyPro's expert technicians will assist you with your questions and help you restore your data in no time.

World Class Data Centers

Your data deserves the highest protection available with the latest in technology. Mozy protects your data in multiple data centers with 24/7/365 onsite monitoring and security, state-of-the-art fire detection and suppression systems, and seismic safeguards that can withstand a 7.5 magnitude earthquake. Redundant power distribution units and diesel generators ensure that even in the worst of circumstances, your data is protected.

Robust Feature Set

MozyPro is packed with all the enterprise-quality features you would expect from a full-service backup solution including:

Security

- **128-bit SSL encryption** — Safely secures your data during transport.
- **448-bit Blowfish encryption** — Safely secures your data on Mozy's servers.
- **Private encryption key options** — Choose Mozy's own 448-bit key or manage your own private key to encrypt your data.
- **Near Continuous Data Protection** — MozyPro automatically detects and backs up new and changed files every 2 hours.

Performance

- **Automatic or scheduled backup** — Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
- **Block level incremental backups** — Saves bandwidth and ensures future backups are lightning fast.
- **Bandwidth throttling** — You can tell MozyPro to use more or less of your upload bandwidth so other higher priority services can run unimpeded.

Ease of Use

- **Version (snapshot) support** — Users have the option of restoring from multiple file versions up to 30 days in the past.
- **Backs up SQL, Exchange and file servers** — Protect mission-critical data easier than ever with MozyPro.
- **Network Drive support** — The ability to back up networked or mapped drives
- **Windows Server support** — In addition to Windows Vista and XP, MozyPro also backs up your Windows 2003 and Windows 2000 servers. 64-bit Windows is supported.
- **Open/locked file support** — No need to close files in order to back them up. MozyPro backs up all open and locked files, including Outlook PST files.

User Simplicity

Intuitive User Interface – Mozy's easy-to-use interface was designed with the "non-tech-savvy" user in mind. It's as simple as selecting the files to back up, scheduling the times, and letting MozyPro do the rest.

Standard or customizable backup sets – Backup sets have been pre-built for the most common file types. By default, each of the pre-built backup sets that pertain to your files will be selected for backup. If the size of the selected backup sets exceeds your quota, you may deselect sets until you are under your quota. Advanced users may edit the pre-built backup sets or create their own.

Status screen – The status of your backup can be easily monitored by right-clicking on the Mozy icon in the system tray and selecting "Status". The Mozy status screen also allows you to manually start your backup or launch the Mozy Configuration.

Alerts – Mozy can alert you when a backup has not performed in a specified number of days.

Multiple restore options – Restore data quickly either from a web interface or right from your computer. Or, for a fee, you can request a DVD restore delivered overnight via FedEx.
