

MozyPro is Connected

Reliability

MozyPro utilizes Consonus AllWaysOn™ Bandwidth to safeguard data and provide consistently reliable service to our customers. AllWaysOn™ Bandwidth is redundant and diversely routed via three redundant IP carriers with direct backbone fiber into our facility (ELI, Global Crossing, Level 3 and XO.)

On-Net fiber is additionally available to American Fiber Systems, AT&T, Qwest and XO

Berkeley Data Systems - Data Center

Location

MozyPro's servers are located in Berkeley Data Systems' secure 24,000 square foot world class data center located in Salt Lake City, Utah.

Seismic Safeguards

Berkeley Data Systems' data center is wholly supported by 24 seismic base isolators, and reinforced by seismic slider bearings and bracing.

This support can withstand a 7.5 magnitude earthquake and meets the Zone 4 Essential Services standard.

Fire Detection & Suppression System

The INERGEN® gas fire suppression system is a waterless system that releases a mixture of nitrogen, argon and carbon dioxide to extinguish fires by reducing the available oxygen to less than 15%.

Power

Power is conditioned and protected by four redundant 500 KVA Leibert UPS systems, twelve redundant PDU systems, a DC power rectifier and an ATS. The power is guaranteed by three 1.7 Megawatt generators supplied by 10,000 gallons of reserved Diesel fuel storage.

World Class Data Center

- 24/7/365 onsite monitoring and security
- 14x redundant Power Distribution Units
- 6x redundant 500 KVA Leibert Uninterruptible Power Supplies
- 3x redundant 1750 KW Diesel Generators
- Seismic bracing and slider bearings
